

NORTH *WAVE*
EXECUTIVE CONDOMINIUM

FLOORPLANS

Artist's Impression

Welcome to your chic abode

Dreams can come true when style and substance meet. Be greeted by visionary and contemporary designs. Where every line and every curve combine to exude a quiet air of designer luxury. You can't help but feel special every time you come home.

Where the future metropolis takes shape

Woodlands Regional Centre, the future metropolis of the North

The growth of Woodlands Regional Centre will include 700,000 sq m of new commercial space and over 100 ha of land that is ready to be developed. It is envisioned to be a vibrant live-work-play environment with excellent accessibility to the city centre. Woodlands Regional Centre will also anchor the North Coast Innovation Corridor. Stretching from Woodlands all the way to Punggol, this corridor will attract new businesses, foster creativity and innovation. Ultimately, this will bring more employment opportunities closer to home so you would not have to travel far for work. And serving this new Regional Centre will be the upcoming Woodlands integrated healthcare development.

Better, faster, easier connectivity

A new, integrated transport hub for seamless connectivity will be developed at Woodlands Central. Bringing together the Woodlands MRT station and bus interchange, this will also serve as the interchange for the North-South Line, the new Thomson-East Coast Line and the planned Rapid Transit Line to Johor Bahru. With the Thomson-East Coast Line, you can enjoy a direct connection right to the city centre. You can also enjoy a shorter travelling time from Woodlands to the city centre, via the upcoming North-South Corridor.

Kampung Admiralty is an upcoming one-stop neighbourhood hub located east of Woodlands Central and served by Admiralty MRT station on the North-South Line.

Legend

Welcome

- 1. Scent Garden
- 2. Side Gate
- 3. Arrival Lounge
- 4. Function Room
- 5. Waterfall

Wet

- 6. Wading Pool

Notes to Specifications:

- 1) *Marble/ Compressed Marble/ Limestone/ Granite/ Stone*
Marble/ compressed marble/ limestone/ granite/ stone are natural stone materials containing veins with tonality differences. There will be colour and markings caused by their complex mineral composition and incorporated impurities. While such materials can be pre-selected before installation, this non-conformity in the marble/ compressed marble/ limestone/ granite as well as non-uniformity between pieces cannot be totally avoided. Granite tiles are pre-polished before laying and care has been taken for their installation. However, granite, being a much harder material than marble, cannot be re-polished after installation. Hence, some differences may be felt at the joints. Subject to clause 14.3, the tonality and pattern of the marble, limestone or granite selected and installed shall be subject to availability.
- 2) *Timber strips*
Timber strips are natural materials containing veins and tonal differences. Thus, it is not possible to achieve total consistency of colour and grain in their selection and installation. Timber strips are also subject to thermal expansion and contraction beyond the control of the builder and the Vendor. Natural timber that is used outdoors will become bleached due to sunlight and rain. Thus, the cycle of maintenance on staining will need to be increased as required. Notwithstanding this note, the Vendor shall remain fully responsible for the performance of its obligations under clause 9 and clause 17.
- 3) *Laminated Flooring*
Laminated flooring is manufactured material which contains tonality differences to match natural wood finish. Thus, it is not possible to achieve total consistency of colour and grain in its selection and installation. Laminated floors are installed in modular planks and are subject to thermal expansion and contraction beyond the control of the builder and vendor. Notwithstanding this note, the Vendor shall remain fully responsible for the performance of its obligations under clause 9 and clause 17.
- 4) *Air-conditioning system*
To ensure good working condition of the air-conditioning system, the system has to be maintained and cleaned on a regular basis by the Purchaser. This includes the cleaning of filters, clearing of condensate pipes and charging of gas. The Purchaser is advised to engage his own contractor to service the air-conditioning system regularly.
- 5) *Television and/or Internet Access*
The Purchaser is liable to pay annual fee, subscription fee and such other fees to the television and/or internet service providers or any other relevant party or any relevant authorities. The Vendor is not responsible to make arrangements with any of the said parties for the service connection for their respective channels and/or internet access.
- 6) *Materials, Fittings, Equipment, Finishes, Installations and Appliances*
Subject to clause 14.3, the brand, colour and model as specified for all materials, fittings, equipment, finishes, installations and appliances to be supplied shall be provided subject to the Architect's selection and market availability.
- 7) *Layout/Location of Fan Coil Units, Electrical Points, Television Points, Telecommunication Points, Telephony System, Door Swing Positions and Plaster Ceiling Boards*
Layout/Location of fan coil units, electrical points, television points, telecommunication points, telephony system, door swing positions and plaster ceiling boards are subject to the Architect's final decision and design.
- 8) *Warranties*
Where warranties are given by the manufacturers and/or contractors and/or suppliers of any of the equipment and/or appliances installed by the Vendor at the Unit, the Vendor will assign to the Purchaser such warranties at the time when vacant possession of the Unit is delivered to the Purchaser. Notwithstanding this assignment, the Vendor shall remain fully responsible for the performance of its obligations under clause 9 and clause 17.
- 9) *False Ceiling*
The false ceiling space provision allows for the optimal function and installation of M&E services. Access panels are allocated for ease of maintenance access to concealed M&E equipment for regular cleaning purposes. Where removal of equipment is needed, ceiling works will be required. Location of false ceiling is subject to the Architect's sole discretion and final design.
- 10) *Glass*
Glass is manufactured material that is not 100% pure. Invisible nickel sulphide impurities may cause spontaneous glass breakage, which may occur in all glass by all manufacturers. The Purchaser is recommended to take up home insurance covering glass breakage to cover this possible event. Notwithstanding this note, the Vendor shall remain fully responsible for the performance of its obligations under clause 9 and clause 17.
- 11) *Mechanical Ventilation System*
Mechanical ventilation fans and ductings are provided to toilets which are not naturally ventilated.

To ensure good working condition of the mechanical ventilation system, the mechanical ventilation system for the exhaust system within internal toilets (where applicable) is to be maintained by the Purchaser on a regular basis.
- 12) *Pre-Fabricated Toilets*
Certain bathroom and W.C may be prefabricated construction and all penetrations are sealed at manufacturer's factory prior to installation on site. Any subsequent penetrations are not recommended as they will compromise the waterproofing warranty.
- 13) *Planters*
Planters are designed to take the loading of potted plants only. No soil material or turf / plants will be provided in the planters.

- 14) *Wall*
All wall finishes shall be terminated at the false ceiling level. There will be no tiles/stone works behind kitchen cabinets/vanity cabinets/mirrors.
- 15) *Cable Services*
The Vendor shall endeavour to procure a service provider for cable television and/or internet services (the "Cable Services") to provide the necessary cabling or connection from its network to the Unit and/or the Housing Project (or any part or parts thereof), so as to enable the Unit and/or the Housing Project to receive the Cable Services. In the event, despite reasonable efforts being made by the Vendor, the Vendor is unable to procure any service provider to provide the said cabling or connection, thereby resulting in there being no Cable Services available in the Unit and/or Housing Project, the Vendor shall not be liable to the Purchaser for any compensation or for any damages costs fees expenses or losses whatsoever, or howsoever incurred, by virtue of the Purchaser being unable to obtain the Cable Services in the Unit and/or the Housing Project.
- 16) *Tiles*
Selected tile sizes and tile surface flatness cannot be perfect and are subject to acceptable range described in the relevant Singapore Standards.

GENERAL DESCRIPTION OF HOUSING PROJECT

Details of building specifications:

Refer to specifications given.

PROPOSED ERECTION OF 6 BLOCKS OF 16-STOREY EXECUTIVE CONDOMINIUM (TOTAL 358 UNITS) WITH LANDSCAPE DECK, SWIMMING POOL AND COMMUNAL FACILITIES ON LOT 06166A MK13 AT WOODLANDS AVENUE 12 /WOODLANDS VIEW (WOODLANDS PLANNING AREA)

358 residential units

Total number of units in each class:

No. of Rooms	Unit Type	Units
2 BR	B1, B1p B2, B2p	47
3 BR	C1, C1a C2, C2p, C2(m), C2(m)p, C2a C3, C3p C4, C4p C5, C5p, C5a, C5a-p, C5a(m), C5a(m)p C6, C6p, C6(m), C6(m)p, C6a, C6a-p	259
4 BR	D1, D1p	31
5 BR	E1, E1p	15
4 BR+1 (PH)	PH 1, PH 2, PH 2(m)	4
